

# How to connect to VPN

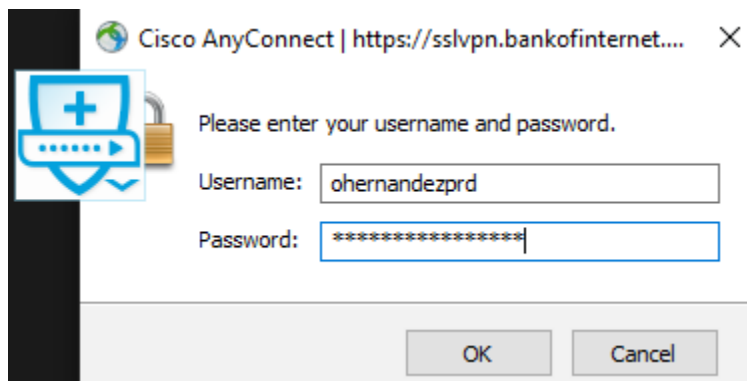

1. launch **Cisco AnyConnect Secure Mobility Client** on your Laptop and select the **Secure VPN** profile:

If you do not see this profile, you can enter this URL in the drop-down box:  
<https://sslvpn.bankofinternet.com/securevpn2>

2. Select **Connect**, enter the required information:  
**Username:** "usernameprd" or "usernameVPN"  
**Password:** account password

3. You will be prompted to enter a code that will be received via SMS or Microsoft Authenticator application (This only applies if you previously configured the application in your mobile device)
4. Type the code and you should now be connected to VPN and able to access the Corporate Network.

## Configure Microsoft Authenticator App

1. Open Google Chrome
2. Navigate to <https://myprofile.microsoft.com>
3. Sign into your Microsoft account using your bofifederalbank.com email address (username@bofifederalbank.com) and your login password as the password

### Sign in

ohernandezprd@bofifederalbank.com

- 
4. A code will be sent via SMS to be typed.

## 5. Select “Update info” from security info

## 6. Select Add method

7. Select Authenticator app and click "Add"

## Add a method

Which method would you like to add?

Authenticator app

Cancel

Add

8. You should then get a QR code screen that looks like this. (Note: if the QR Code does not work for you, a code is provided below that will offer the same functionality)

## Microsoft Authenticator

### Scan the QR code

Use the Microsoft Authenticator app to scan the QR code. This will connect the Microsoft Authenticator app with your account.

After you scan the QR code, choose "Next".
